

# PEPTONA

Will Help You

It puts the "PEP" into run down systems. It contains organic iron, manganese and cod liver oil extract, medicinal agents extensively used as a tonic and strength builder. Valuable for enriching the blood, of aiding assimilation of food, and for building the health generally.

If you have trouble recovering normal health after grippe, cold, bronchitis or influenza, if your blood is not up to standard, if your food assimilation is faulty, if you are tired or run down, then you need PEPTONA to help you. It is our best tonic; it is pleasant to take and easily tolerated by even the most sensitive stomach. We will refund your money if it does not do you good.

## MAILING LIST CORRECTED

The subscription list of the Expositor has been corrected and all new names added. If you find any error in the credit on your label report to this office as soon as possible that we may rectify same. Many of our subscribers do not understand the reading on the label. If you find Jan. 20 on the printed label that means that you are paid up to the 1st of January 1920. Should your label read Jan. 18 or 19, then it shows you are in arrears. On account of the scarcity of news print and the high price charged for this important commodity which goes into the getting out of a newspaper, it is most essential that all subscribers see to it that they are paid up.

In buying news print it is a cash deal. For this reason we must have the cash to buy with. We are sure that those of our subscribers who are in arrears will gladly square up and in this event make it easy for us to secure the necessary news print with which to publish the Expositor.

## MEN IN RANKS GIVEN CHANCE

Advantage of Enlisting in Marine Corps Pointed Out

That the war-time policy of obtaining officers for the United States marine corps from the ranks be continued, is the recommendation made by Secretary of the Navy Daniels, according to a report received at the marine corps recruiting office, 207 Huron-av., Port Huron.

The secretary points to the work of officers commissioned from the ranks during the war, as his reason for making this recommendation. He also recommends that additional officers be commissioned for the marine corps aviation branch, and that special aviation grades be created for enlisted men. A permanent marine corps of 27,467 officers and men, or 20 percent of the naval strength is also recommended, as well as the creation of chief warrant rank for marines.

The achievement of the corps in the war are reviewed and their many peace time activities in all parts of the world are pointed out as sufficient reason for increasing the permanent strength. Attention is called to the new marksmanship records made by marines and to the fact that marines won 27 of the 34 matches shot recently at the National Rifle Association tournament. The report received at the recruiting office is a portion of the secretary's report on the condition of the entire naval establishment.
